# Chapter 4

# Author Index

The Author Index is similar to the index of the First Dictionary (1983 and 1986). For each author (col.1), it gives the corresponding reference codes (col.2 and 3) and the main acronyms (if any) (col.4).

The Author names are arranged alphabetically taking into account only the first letter of the first name (e.g. P. for Hodge P.W.). The symbol + is used when there is more than one author, as in Col.8 of the Table of Acronyms. The ordering is explained by the following example:

Hodge P. (or P.W.) (one author) or Hodge P.+ (or P.W.+) (first author)
+Hodge P. (or P.W.) (one of two or several authors, not the first).

Within these two groupings, the references are ordered by year. (Notice that van der Hucht, ... de Vaucouleurs ..., are classified with V, ...D... letters).

The reference is characterized by its 8-digit code number, as explained in Chap. 3 and/or its *SIMBAD* 19-figure code, described in Chap. 6 and Table 6.5

The acronyms quoted here are the "main" ones as defined for the Table of Acronyms: no synonyous acronyms are given here. On the other hand, when a reference contains two or more "main acronyms", all are quoted, separated by a comma.
